Computer systems engineer with a strong passion for software development and problem-solving, I am dedicated to leveraging technology to enhance our lives. With over a year of experience in web development, I have honed my skills in creating robust and user-friendly applications. I thrive on the opportunity to tackle complex challenges and find innovative solutions, continuously seeking to improve the efficiency and effectiveness of software systems. My commitment to excellence and my ability to adapt to evolving technologies make me a valuable asset in any development team. Together, let's build software that revolutionizes the way we live and work.

Education

_____

Tecnológico de Monterrey, Edx - 02/2023- In progress
Full Stack Flex Web Development Bootcamp
Through this experience, I have acquired valuable practical knowledge in front-end technologies including HTML, CSS, and JavaScript. While my proficiency in web development is already commendable, my primary objective lies in fortifying my backend skills.

Bachelor's Degree in Computer Systems Engineering
Universidad del Valle de México - 02/2018 - 05/2022

Experience

_____

Trainee - Junior developer   **30/05/22- 25/11/22**
Infosys
Part of Foundation Program for Infosys CDMX, where I attended and certified in multiple web
development courses through the company's platform, throughout the course I worked with teammates from
all around the world in multiple projects, developing efficient solutions to real world problems.
- The final project I worked on and I presented to all my coworkers was nominated for best application for real world problems.

Trainee - Front end Development   **31/01/22 - 27/05/22**
LearnAla
I had the opportunity to start working on a brand new development, where I was in charge of designing, developing and testing the front end part of the new product.
The application consisted in an inventory for shops or business owners where they can easily track their inventory from their phones, or any other device and easing the job of updating the inventory as well.
- UI design for web application (adobe xd).
- Web application creation for the company's user management. (ReactJS, HTML, CSS, JavaScript Material-UI, Git).
- Design and construction of a inventory management system,
   allowing the user to add different items with their
   unique description and classification, (React.js | HTML | CSS | JavaScript | Material-U | Adobe XdI).

_____
